

## Schedule of Takahama Unit No.2 Reactor Startup and Power Control Operation

September 14, 2023  
The Kansai Electric Power Co., Inc.

We hereby announce that Takahama Nuclear Power Station Unit No.2 (Pressurized Water Reactor, rated electric output of 826MW, rated thermal output of 2440 MW) has been under the 27th periodic outage inspection since November 25, 2011, is expected to start up on September 15, 2023 and reach the criticality on September 16, 2023.

After reaching the criticality, the plant will start power control operation on September 20, 2023 as the final stage of the periodic outage inspection following various types of tests. The plant will restart full-scale operation after the plant performance test on October 16, 2023.

END
