

Schedule of Takahama Unit No.1 Reactor Startup and Power Control Operation

July 26, 2023
The Kansai Electric Power Co., Inc.

We hereby announce that Takahama Nuclear Power Station Unit No.1 (Pressurized Water Reactor, rated electric output of 826MW, rated thermal output of 2440 MW) has been under the 27th periodic outage inspection since January 10, 2011, is expected to start up on July 28, 2023 and reach the criticality on July 29, 2023.

After reaching the criticality, the plant will start power control operation on August 2, 2023 as the final stage of the periodic outage inspection following various types of tests. The plant will restart full-scale operation after the plant performance test on August 28, 2023.

END
