## Onagawa Nuclear Power Station Unit 2 connects to the grid

It is our great pleasure to announce that the Onagawa Nuclear Power Station Unit 2 (BWR, 825MW) started to generate electricity and connected to the grid today, December 7, 2024 at 6:30 (Japan Standard Time).

The plant is expected to start commercial operation\* at December 26 2024. Meanwhile, various testing, inspections and the preparation works will be conducted towards its full operation.

We will continue to prioritize safety as we work to resume power generation, stopping to check as necessary and responding appropriately to each and every issue.

**\* Commercial operation**

This will begin after completing all the pre-service inspection and the comprehensive inspection, and receiving confirmation certificate from the Nuclear Regulation Authority in Japan.
